

# Myers-Briggs® Tool Helps University of Alberta MBAs Master Themselves

## Meeting Their High Expectations Along the Way

The executives who come to the University of Alberta to earn their MBA degree have different reasons for seeking the distinction, and they come from all sorts of corporate backgrounds. But there's one thing they have in common: With help from the tools of type, they're learning to master themselves as they become masters of business administration.

"These are leaders, executives who are likely jumping to higher-stress roles. They're used to being the boss," says Laurie Hillis, executive education specialist in the U of A's Alberta School of Business. "The idea is to help them learn how to be themselves while also being a part of a diverse team."

Hillis has worked with the school's MBA programs for seven years. It was her expertise with *Myers-Briggs Type Indicator*® (MBTI®) tools that led to her being invited to build an MBTI session into the formal curriculum for MBA students. She was certified to use the MBTI assessment from Psychometrics Canada in 1995.

Hillis leads sessions with full-time and part-time students, including senior managers returning to school for the intensive Executive MBA (EMBA) program. For the team-based EMBA program, Hillis delivers the MBTI session during the first week's orientation.

She says learners run the gamut of leadership roles, from the energy sector to finance to information technology, and from the public sector to not-for-profits. Most are mid-career professionals looking to better their future options. "It's about how to help successful people enter new stages of their career," she notes.

For Hillis, crafting a helpful session comes with two challenges: meeting the high expectations of executives who commit every other Friday and Saturday to the program, and meeting the standard of excellence for one of the world's top-ranked EMBA programs. With that in mind, she tailors the goals of her MBTI sessions to the program's learning objectives: enhancing individual and team dynamics, understanding the stages teams go through, and leveraging the interplay between polarities, such as individual and team performance, or positivity and productivity.

“The idea is to help them learn how to be themselves while also being a part of a diverse team.”

The MBTI Step II™ tool anchors her sessions, but she also employs the MBTI® Stress Management Report and the *Introduction to Type® and Leadership* booklet for those in the EMBA program. For her half-day sessions with groups of up to 150 regular MBA students—who tend to be younger and less familiar with psychometric tools—she draws on the *Introduction to Type® and Communication* booklet along with the MBTI Step II tool.

Hillis encourages looking at type as a way to live more authentically. She cites learners describing themselves as “two different people—one at work and one at home”—a personal–professional split that can be a source of stress. “We want to make it easy for people to see that type is about their whole life.”

An important outcome is that teams of learners develop a set of shared norms based on MBTI principles, a “cohort culture” of expected behavior, such as showing mutual respect, honoring others’ viewpoints and appreciating diversity. These norms guide them over the next two years as they work in different team configurations—including a final-semester module in China, where they’re exposed to a global business climate in which cultural norms may differ.

Hillis says one of the most satisfying results of her MBTI sessions is seeing people drop their protective armor and become more vulnerable with each other: “Once they’ve normalized their fear, they realize they can just be people together. It’s an amazing way to start their journey.”

To aid the process, she has participants sign a permission slip for themselves, “to ask for help, to be vulnerable, to not have all the answers, to reschedule a team meeting if that’s necessary for them to meet a family commitment.”

The aim, she says, is to start to build trust. “We use no titles. We survive and thrive as a cohort.”

This year, Hillis expanded her half-day EMBA session to a full day for the first time, and she says learners are benefiting from the longer MBTI component. “It’s giving us more time to work through the process and go deeper into building trust and developing guiding principles.”

Hillis says she appreciates the chance to be part of a top-notch learning experience for executives. “I feel grateful that my job has given me this kind of opportunity, and I feel honored to help people learn about themselves....”

“This work anchors my own goal of helping people be courageous in their leadership.”

—Sean Townsend

**Laurie Hillis** is a senior faculty member at the University of Alberta’s Centre for Executive Education and the president of a Calgary-based leadership consulting practice in operation since 1992. She is a Certified Human Resources Professional, an MBTI® Master Practitioner and a professional certified coach. An accomplished writer on leadership and emotional intelligence, she has consulted to organizations in the public, private and not-for-profit sectors.

## About CPP, Inc.

At CPP, our only job is to help you be a better HR professional and, in turn, help every employee flourish. While we're best known for our products, like the *Myers-Briggs Type Indicator*® assessment, CPP is also a group of people who can offer you the information, guidance, and support you need.

We offer solutions to help you improve organizational performance and address whatever challenges you face—from team building, leadership and coaching, and conflict management to career development, selection, and retention. Perhaps that's why millions of people in more than 100 countries use our products each year. They include individuals at Fortune 500 companies and businesses of all sizes, as well as educators, government agencies, and training and development consultants.

Since its founding in 1956, CPP, Inc., has been a leading publisher and provider of innovative products and services for individual and organizational development. Available in more than 20 languages, the company's hundreds of products help people and organizations grow and develop by improving performance and increasing understanding. Among CPP's world-renowned brands and services are the *Myers-Briggs Type Indicator Strong Interest Inventory*®, *Thomas-Kilmann Conflict Mode Instrument* (TKI), *FIRO*®, *CPI 260*®, and *California Psychological Inventory*™ (CPI™) assessments, and CPP Professional Services.

**Let's make a difference together.
